Advanced Practice in Lower Limb Ulceration

For Leg Ulcer Specialist
Nurses and Tissue
Viability Nurses

This
programme
will give the
candidate
**6 CPD
credits**

Course information

Advanced Practice in Lower Limb Ulceration

1-day course for Leg Ulcer Specialist Nurses and Tissue Viability Nurses with an interest in lower limb ulceration who are already competent in application of compression bandaging

At Accelerate, education matters to us - a lot. It is an important part of our work. It enables transformations in local services, healing rates and patient experience.

The effective management of complex chronic wounds requires specialist skills, knowledge and understanding. We firmly believe in the importance of education and the sharing of expertise and experience.

This course is far more than a simple 'how to' guide. It will provide enhanced skills, develop critical thinking and encourage creativity in the management of these complex wounds.

You will be working with national experts and key opinion leaders who are skilled in the creative and person centred approach to leg ulcer management. Our people regularly present their work at conferences and events in the wound management arena and are recognised as innovators and leaders in their field.

This course attracts 6 CPD points towards study hours

Learning outcomes

- What makes a lower limb wound complex?
- When to use higher levels of compression than standard 40mmHg
- The biomechanics of mobility and gait to enhance healing potential
- Advanced bandaging skills including strapping to manage retro-malleolus ulcers
- How to manage complex ulcers once healed?

Date

19 February, 2020
