Developing skills in leg ulcer management –
a multi-disciplinary approach

RCN accredited 5-day course
for registered nurses

This
programme
will give the
candidate
**30 CPD
credits**

About your course

At Accelerate, education matters to us – a lot. It is an important part of our work. It enables transformations in local services, healing rates and patient experience.

The effective management of complex chronic wounds requires specialist skills, knowledge and understanding. We firmly believe in the importance of education and the sharing of expertise and experience.

This course is far more than a simple 'how to' guide. It will provide enhanced skills, develop critical thinking and encourage creativity in the management of these complex wounds.

You will be working with national experts and key opinion leaders who are skilled in the creative and person centred approach to leg ulcer management. Our people regularly present their work at conferences and events in the wound management arena and are recognised as innovators and leaders in their field.

This is a competency based five day leg ulcer training programme aimed at community nurses who manage patients with lower limb wounds and attracts 30 CPD points towards study hours.

Learning outcomes

- Provide holistic assessment of patients with lower limb wounds based upon best evidence based care
- Understand vascular assessment and the use of different compression modalities to enhance practical skills and patient outcomes
- Become proficient in the use of doppler, enhanced compression bandaging and hosiery measuring and fitting

This programme has been accredited by the RCN Centre for Professional Accreditation until 7 March 2021.

Accreditation applies only to the educational content of the programme and does not apply to any product.

The RCN cannot confirm competence of any practitioner.
