a multi-disciplinary approach

RCN accredited 3-day course - virtual
and face to face options available

This
programme
can count for
up to **18 hours**
of participatory
learning
for NMC
Revalidation

About your course

At Accelerate, education matters to us – a lot. It is an important part of our work. It enables transformations in local services, improved healing rates and patient experience.

The effective assessment and management of lower limb wounds requires skills, knowledge and understanding. We firmly believe in the importance of education and the sharing of expertise and experience.

This course is far more than a simple 'how to' guide. It will provide clinical skills and the development of critical thinking in the management of lower limb wounds.

You will be working with national experts and key opinion leaders who are skilled in the creative and person centred approach to leg ulcer management. Our people regularly present their work at conferences and events in the wound management arena and are recognised as innovators and leaders in their field.

This is a competency based three day training programme aimed at those who manage patients with lower limb wounds and can count for up to 18 hours of participatory learning for NMC Revalidation.

Learning outcomes

- Perform a holistic assessment of a patient presenting with a lower leg wound.
- Identify whether the patient would be suitable for compression therapy by performing a vascular assessment (Doppler) to record ankle brachial pressure index (ABPI) and be able to interpret the results.
- Identify the best options of compression therapy in partnership with the patient. Learners will understand the importance of correct application of the chosen method, such as compression wraps, bandages or hosiery.

This programme has been accredited by the RCN Centre for Professional Accreditation until 10th May 2022.

Accreditation applies only to the educational content of the programme and does not apply to any product.

The RCN cannot confirm competence of any practitioner.

About your course

How the course is run

The programmes will have a variety of formats from completely virtual to completely face to face in the Accelerate Academy at St Joseph's Hospice, Hackney, London.

The virtual sessions will be held using the MS Teams virtual learning environment (VLE) with informative webinars, discussion, Q & A and one to one sessions.

We have an Academy Moderator at Accelerate who can support you in digitally preparing for the course should you need assistance.

You will need to have access to a laptop, tablet or computer with video and sound capability so you can access the VLE effectively. You will also need peace and quiet.

We will be using the chat, break out and polling features of our VLE during the virtual courses to make the sessions interactive and we would ask you to participate as if in a face to face situation.
