**taking your leg ulcer skills to the
next level**

RCN accredited 3-day course - virtual

This
programme
can count for
up to **18 hours**
of participatory
learning
for NMC
Revalidation

About your course

At Accelerate, education matters to us – a lot. It is an important part of our work. It enables transformations in local services, improved healing rates and patient experience.

The effective assessment and management of lower limb wounds requires skills, knowledge and understanding. We firmly believe in the importance of education and the sharing of expertise and experience.

This course builds on the existing skills of participants who are already regularly managing patients with lower limb problems who want to take their current clinical expertise to an advanced level.

You will be working with national experts and key opinion leaders who are skilled in the creative and person centred approach to leg ulcer management. Our people regularly present their work at conferences and events in the wound management arena and are recognised as innovators and leaders in their field.

This is a competency based three day training programme aimed at those who manage patients with lower limb wounds and can count for up to 18 hours of participatory learning for NMC Revalidation.

Learning outcomes

- Build on your existing skills of lower limb assessment and further enhance your practice in the management of the foot and toes. This will include toe brachial pressure index measurement, toe bandaging and stumping.
- Learn more about chronic oedema and heart failure to support decision making and treatment planning of patients who require compression therapy and have a diagnosis of heart failure.
- Enhance your clinical practice through learning about the use of medications in lower limb care such as antimicrobials and topical steroids.

This programme has been accredited by the RCN Centre for Professional Accreditation until 10th May 2022.

Accreditation applies only to the educational content of the programme and does not apply to any product.

The RCN cannot confirm competence of any practitioner.

About your course

How the course is run

The programmes will have a variety of formats from completely virtual to completely face to face in the Accelerate Academy at St Joseph's Hospice, Hackney, London.

The virtual sessions will be held using the MS Teams virtual learning environment (VLE) with informative webinars, discussion, Q & A and one to one sessions.

We have an Academy Moderator at Accelerate who can support you in digitally preparing for the course should you need assistance.

You will need to have access to a laptop, tablet or computer with video and sound capability so you can access the VLE effectively. You will also need peace and quiet.

We will be using the chat, break out and polling features of our VLE during the virtual courses to make the sessions interactive and we would ask you to participate as if in a face to face situation.

This programme has been accredited by the RCN Centre for Professional Accreditation until 7 March 2021. Accreditation applies only to the educational content of the programme and does not apply to any product. The RCN cannot confirm competence of any practitioner.
