and lymphoedema care

Learning with **Accelerate Academy**

Introduction to chronic oedema
management

This
programme
can count for
up to **12 hours**
of participatory
learning
for NMC
Revalidation

About your course

At Accelerate, education matters to us – a lot. It is an important part of our work. It enables transformations in local services, improved healing rates and patient experience.

The effective assessment and management of chronic oedema requires skills, knowledge and understanding. We firmly believe in the importance of education and the sharing of expertise and experience to achieve this.

You will be working with national experts and key opinion leaders who are skilled in the creative and person centred approach to chronic oedema management.

Our people regularly present their work at conferences and events in the wound management arena and are recognised as innovators and leaders in their field.

This is a competency based two day training programme aimed at those who manage patients with chronic oedema and are already competent in leg ulcer assessment. Can count for up to 12 hours of participatory learning for NMC Revalidation.

Learning outcomes

- Develop an understanding of the anatomy and physiology of the lymphatic system, chronic oedema and lymphovenous disease.
- Increase your knowledge about primary, secondary and chronic oedema, the differences, and similarities.
- Understand more about the use of compression therapy in complex patients with conditions such as heart failure and renal impairment
- Explore the evidence base for different treatment modalities such as compression bandaging and hosiery
- Develop practical skills and confidence in using these treatment modalities
