Introduction to Cancer Related Lymphoedema

An on-line course in our
Virtual Learning Environment (VLE)

This
programme
can count for
up to **3 hours**
of participatory
learning for
revalidation

About your course

At Accelerate, education matters to us – a lot. It is an important part of our work. It enables transformations in local services and patient experience.

The effective assessment and management of cancer related lymphoedema requires skills, knowledge and understanding. We firmly believe in the importance of education and the sharing of expertise and experience.

The course gives an overview of lymphoedema secondary to cancer and its treatments. It will help you define, identify, and provide basic management to those people at risk of developing / living with lymphoedema secondary to cancer and / or its treatment.

It is written by national experts and key opinion leaders who are skilled in the creative and person-centred approach to the management of cancer related lymphoedema. Our people are published experts, recognised as innovators and leaders in their field and regularly present their work at conferences and events.

The course is suitable for any health care professional – Medical, Nursing, Allied Health Care Professionals (including Physiotherapists, Occupational Therapists, Radiographers, Operating Department Practitioners, Mammographers, Dieticians, Speech and Language Therapists) Pharmacists and Support Staff

Course content

- To understand the difference between acute oedema, transient oedema, chronic oedema and cancer related lymphoedema
- To recognise those individuals at risk and be able to advise accordingly
- To know when and how to refer on
- To provide basic advice and management of cancer related lymphoedema
